## ArmorerLink® Tracking PPE During COVID-19 Crisis

**Hillsboro, Oregon:** ArmorerLink serving law enforcement and the military has been called into service by law enforcement agencies in Oregon and California to track Personal Protection Equipment, PPE, during the COVID-19 pandemic.

ArmorerLink law enforcement agencies have activated Emergency Operations Centers, EOC's, in most areas. Law enforcement, working with other public health, public safety, and regional service partners have realized a need to track and account for PPE inventories throughout their respective jurisdictions. ArmorerLink is being used for this real time tracking and distribution need.

Chief Executive Officer Joe Ganete said *“ArmorerLink was designed to help law enforcement agencies track all aspects of inventory related to firearms and vital equipment. Having transparency on where things are, what has been distributed, and where more equipment is needed is critical to our first responders. This is a perfect use of the system to address an unforeseen need.”*

### **About ArmorerLink®**

ArmorerLink is the leading Firearm Management System for Law Enforcement and the Military that provides firearm tracking, training and maintenance compliance. ArmorerLink is affordable, functional and easy to use.
